ABHINANDAN JAIN

Game Developer · Unity (2D & 3D) · AR / VR / XR

+91 8837798340 | ajain191204@gmail.com | GitHub | LinkedIn | itch.io | India

PROFESSIONAL SUMMARY

Unity Game Developer with hands-on experience building 2D, 3D, and XR applications using C#. Skilled in gameplay programming, player controllers, input systems, and core mechanic implementation. Experienced in developing complete game systems including movement, combat, and interaction logic. Strong foundation in object-oriented programming, debugging, and performance optimization. Proven ability through hackathons and academic projects involving VR, AR, and open-world gameplay. Passionate about creating immersive, scalable, and technically robust gameplay experiences.

TECHNICAL SKILLS

Programming: C#, C++ (basic)

XR Frameworks: XR Interaction Toolkit, AR Foundation

Dev Tools: Git, Visual Studio, Unity New Input System

Software Practices: Version control, SDLC, OOP

Game Engine: Unity 2D / 3D / XR

Gameplay Systems: Movement, combat, input, physics

Creative Tools: Blender, Photoshop (UI), Lens Studio

AI & Other: Gemini API, AI Prompting, Vibe Coding

SOFT SKILLS

Analytical Thinking · Time Management · Team Collaboration · Clear Communication · Problem Solving

PROJECTS & EXPERIENCE

Gameplay Programmer — Academic & Hackathon Projects

2025 – 2026

Winter Survival: The Hunt for Tomorrow

3D Open-World Survival · Unity · Digifest Hackathon (Top 10)

- Built open-world exploration with predator AI, day-night cycle & survival quota system
- Managed level layout, asset integration, and dynamic adaptive soundtrack
- Used problem-solving and debugging techniques throughout development

VR Shooter — XR Combat Prototype

Unity · XR Interaction Toolkit · C#

- Implemented VR shooting mechanics, enemy behavior & controller-based aiming
- Built XR object interaction, grabbing, and real-time input mapping
- Optimized scene performance for consistent VR frame stability

Ballgame — 2D Physics Platformer

Unity · Cross-Platform (PC + Mobile) · Published on itch.io

- Built Rigidbody physics movement, checkpoints, hazards & multi-level progression
- Ported to mobile with touch controls, performance optimization & cross-platform builds
- Strong OOP architecture with modular, tag-based collision detection

False Face — Tabletop Card Game

Social Deduction · 28 Playtests · 4.8/5 Satisfaction

- Designed 34-card asymmetric deduction game optimized for exactly 4 players
- Achieved perfect 50/50 win balance through 28 structured playtests with data collection
- Authored 40,000+ word publisher-ready GDD with competitor analysis for 6 games

AR Education App (In Progress — 65% Complete)

AR Foundation · Gemini API · Unity · Android · Physics for Class 8

- Building augmented reality Physics experiments aligned to school curriculum
- Integrating Gemini AI tutor for intelligent quiz evaluation & interactive learning

EDUCATION

Bachelor of Engineering — Computer Science Engineering

2023 – Present

Chitkara University · Game Development Specialization

ACHIEVEMENTS

- ★ **Phase 2 Qualifier** — XR Hackathon 2025 (WAVES)
- ★ **Top 10 Finish** — Digifest Hackathon 2026, Jaipur
